Frontend: React.js | TypeScript | Bootstrap | Tailwind CSS

Backend: Node.js | Express.js | Laravel | Django

Databases: MySQL | PostgreSQL | MongoDB

Tools: Git | REST APIs | Postman | JWT/OAuth2,

Certification and License

100 Days of Coding Challenge – Udemy | Complete Web Development Bootcamp – Udemy

Projects

Saloon POS System – Laravel, MySQL

- Built a scalable, role-based POS system enabling end-to-end salon operations, including staff workflows and admin controls.
- Engineered high-performance billing and payroll modules with automated salary, advance, and loan handling.
- Designed data-driven dashboards and optimized backend APIs, ensuring low-latency transactions and reliable reporting.

Franchise Expo Registration System | React, Python, PostgreSQL

- Built a scalable event registration platform with secure user onboarding and participant capacity enforcement.
- Integrated a payment gateway to handle paid registrations with real-time transaction validation.
- Developed an admin monitoring dashboard to track registrations, payment status, and user categories (paid/unpaid)

Corporate Training Consultancy Platform | React, Node.js, MongoDB

- Built a scalable trainer booking platform enabling clients to schedule consultancy sessions in real time.
- Implemented secure role-based access control (RBAC) for admins, trainers, and clients.
- Designed a CRUD-driven admin dashboard to manage trainers, services, and bookings efficiently.

Car Accessories Inventory & Billing System | React (TypeScript), Django, PostgreSQL

- Built a full-stack inventory and billing platform supporting product CRUD, real-time stock updates, and return handling.
- Implemented vendor management workflows including vendor CRUD operations and purchase/return tracking.
- Developed secure customer billing and admin authentication using JWT-based access control, ensuring data integrity and role separation.
