Frontend: React.js , TypeScript , Bootstrap , Tailwind CSS

Backend: Node.js , Express.js , Laravel , Django

Databases: MySQL , PostgreSQL , MongoDB

Authentication & Security: JWT, RBAC, OAuth2

Tools: Git , REST APIs , Postman

Work Experience

Full Stack Developer & IT Administrator – Axorbit Technologies

Kochi, India | Jun 2025 – Present

- Developed and maintained full-stack web applications using React, Node.js, and Python
- Designed RESTful APIs with JWT-based authentication and role-based access control
- Refactored and optimized codebase to improve performance and maintainability
- Collaborated with cross-functional teams to deliver projects on schedule

Full Stack Developer – Glinjos Innovations

Kannur, India | Jun 2023 – Jun 2025

- Built REST APIs using Laravel for client-server communication
- Designed and optimized relational databases using MySQL and SQLite
- Developed responsive user interfaces using modern frontend practices
- Integrated backend systems with Flutter-based mobile applications

Projects

Car Accessories Inventory & Billing System | React (TypeScript), Django, PostgreSQL

- Built a full-stack inventory and billing system using React (TypeScript) and Django
- Implemented real-time stock updates and vendor management workflows
- Secured APIs using JWT-based authentication and role separation

Franchise Expo Registration System | React, Django, PostgreSQL

- Developed a scalable event registration platform using React and Django
- Integrated payment gateway with real-time transaction validation
- Built an admin dashboard for registration and payment tracking

Corporate Training Consultancy Platform | React, Node.js, MongoDB

- Built a scalable trainer booking platform enabling clients to schedule consultancy sessions in real time.
- Implemented secure role-based access control (RBAC) for admins, trainers, and clients.
- Designed a CRUD-driven admin dashboard to manage trainers, services, and bookings efficiently.

Star Cool | Laravel, MySQL

- Built a role-based service management system using Laravel and MySQL
- Implemented service workflow from customer request to payment tracking
- Developed REST APIs and a responsive dashboard integrated with a technician mobile app

Saloon POS System – Laravel, MySQL

- Built a role-based POS system using Laravel and MySQL for salon operations
- Implemented billing, payroll, advance salary, and loan management modules
- Designed optimized APIs and dashboards to support daily business transactions
